

QUALITY POLICY

Zavcor and Truk-King have established an excellent reputation by providing a reliable and efficient trucking service since our inception in 1990.

As a proud corporate citizen, we recognize the importance of open and respectful communication with our customers, employees and the community.

We are committed to continually improving our standards of quality. This will be reflected in everything we do, from keeping our trucks and facilities safe, clean and well maintained, to training and motivating great employees who share our philosophy.

We will continue to dedicate the resources necessary to maintain our focus on safety and customer satisfaction, thereby meriting the support and goodwill of our customers.

Unwavering commitment to these principles by all our management and employees is the foundation of our continued success.
